

# November

This month we will have fun exploring the animals awake at night.

- Bats, owls, mice, foxes, and other Nocturnal Animals will be the focus of our Shared Reading, Reading Booklets, Art, and Center Activities.
- Our Art Activities will involve creating a Bat Cave complete with bats and a night sky mural as well as a Fall tree with owls.

- Nocturnal Animals use many senses. Our science explorations will focus on our senses of hearing, and smell.
- We will continue rhyming activities and strengthen our phonics skills as we start blending sounds to read words. We will also use these letters sounds to begin writing our own words and sentences.
- In Math we will introduce the nickel and addition with concrete objects.

## Thanksgiving Blessings

- We will read the Bible Story of Samuel in the Night and learn that we can listen with our hearts to hear God's plans for us.
- We will discuss the concept of being Thankful and explore the story of the Pilgrims, the Native American Indians, and the First Thanksgiving.
