

# October

Water, Water Everywhere

This month is all about water!

- The Water Cycle will come to Life in a giant stuffed paper display created by the children. Science words such as precipitation and evaporation will become part of our vocabulary. More water science will be explored as we experiment with the various properties of water.
- The Mrs. Wishy Washy book series will be the focus our shared reading this month and many of our Math and Phonics Centers.
- We will learn our Vowels and learn that each Vowel has 2 sounds.

- We will start making and reading Silly Sentences as well as read predictable booklets about Water and Fall.
- In Math we will learn to tally and recognize and count pennies.
- We will explore water in the Bible with Baby Moses on the river, Moses parting the Red Sea, and Jesus Calming the Storm and Walking on Water.
- Christopher Columbus sailed the Seas! We will study and explore his accomplishments.
